

Ultimate Guide to Free PPTP VPN For Beginners

PPTP, which stands for Point to Point Tunneling Protocol is one of the oldest and most trusted ways of implementing a VPN. It was developed by Microsoft and uses a GRE tunnel with a TCP control channel to bypass various geo-based restrictions. Since free PPTP VPN has been around for years now and is pretty easy to setup, it is quite popular as well. Read on and learn the basics of PPTP VPN free with a free PPTP VPN list as well.

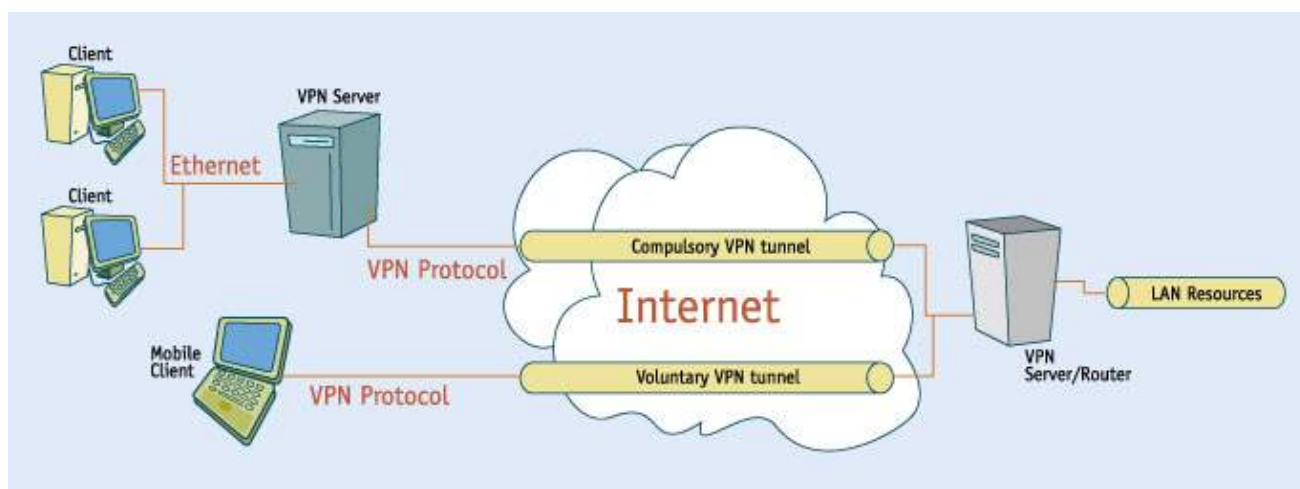

- [Part 1: What is PPTP VPN?](#)
- [Part 2: Free PPTP VPN Server List](#)
- [Part 3: How to Setup Free PPTP VPN on Your Computer?](#)
- [Part 4: An Easier Alternative to Setup VPN](#)

Part 1: What is PPTP VPN?

The free VPN PPTP was earlier introduced by Windows, but was later adopted by all the other platforms like Linux, macOS, iOS, Android, etc. Even though the layer of encryption in free PPTP VPN is not as secure as other protocols, it makes it pretty fast. Due to this, the PPTP VPN is widely used to ss location-based restrictions.

free VPN PPTP supplies data into packets and send them through a tunnel to attain a secure
connection.

- It supports the 128-bit Point to Point encryption.
- It is quite easy to setup PPTP free VPN (only the server address, username, and password are needed).
- Even though PPTP is secure and pretty fast, it is not as safe as other protocols (that support 256-bit encryption). It is believed that the government is now able to crack it.
- The tunneling is of two types in PPTP – Voluntary and Compulsory. Voluntary tunneling is initiated from the client's end while compulsory tunneling is initiated from the server's end. Compulsory tunneling should be supported by the router.

By attaining a free VPN PPTP server, you can easily connect to it. For instance, if you wish to connect to Singapore, you would need free PPTP VPN Singapore host IP. We have provided a free PPTP VPN list in the next section.

Part 2: Free PPTP VPN Server List

	192.241.184.169	sshagan	abcd1234	USA
	192.241.179.120	sshagan	abcd1234	USA
	162.243.33.71	sshagan	abcd1234	USA

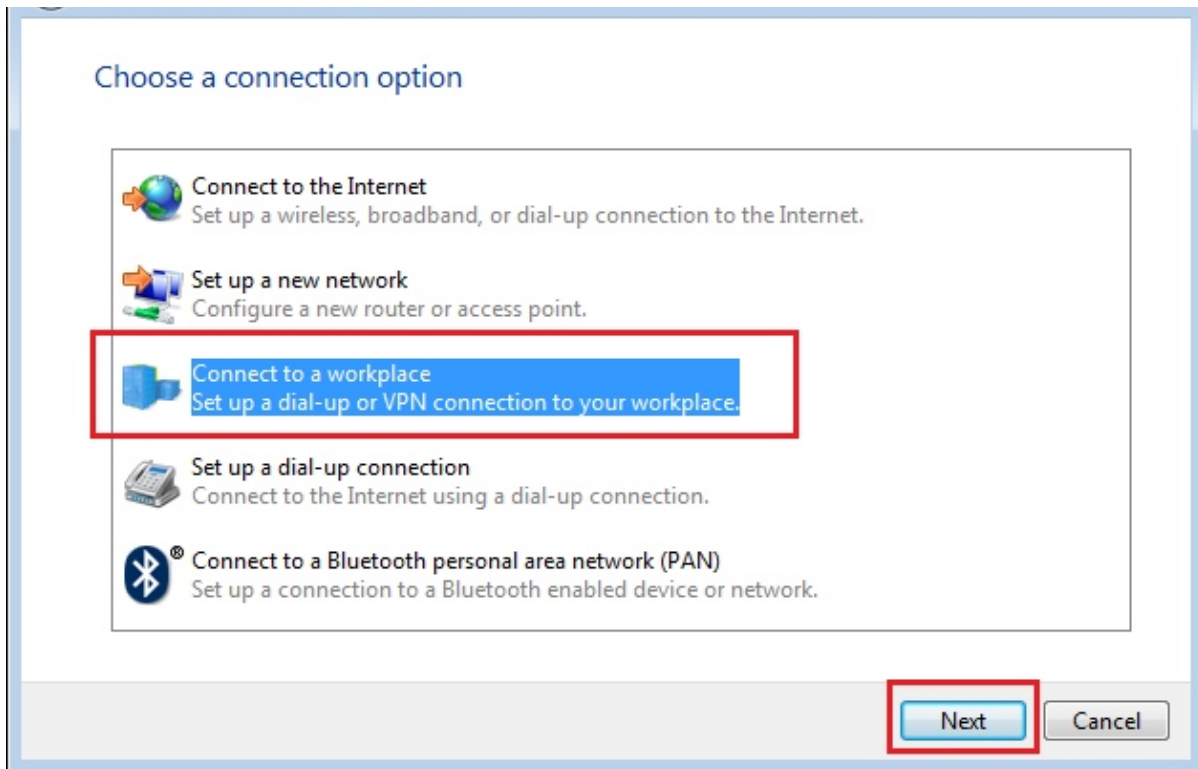

Part 3: How to Setup Free PPTP VPN on Your Computer?

After getting to know about so many free PPTP VPN Singapore, USA, Canada, UK, and other countries, you can easily learn how to set up a PPTP VPN free. The process is quite simple and can be implemented in all the leading versions of Windows (and other operating systems). Though, there could be a slight change in the overall interface of the OS you are using. To set up free VPN PPT, follow these steps:

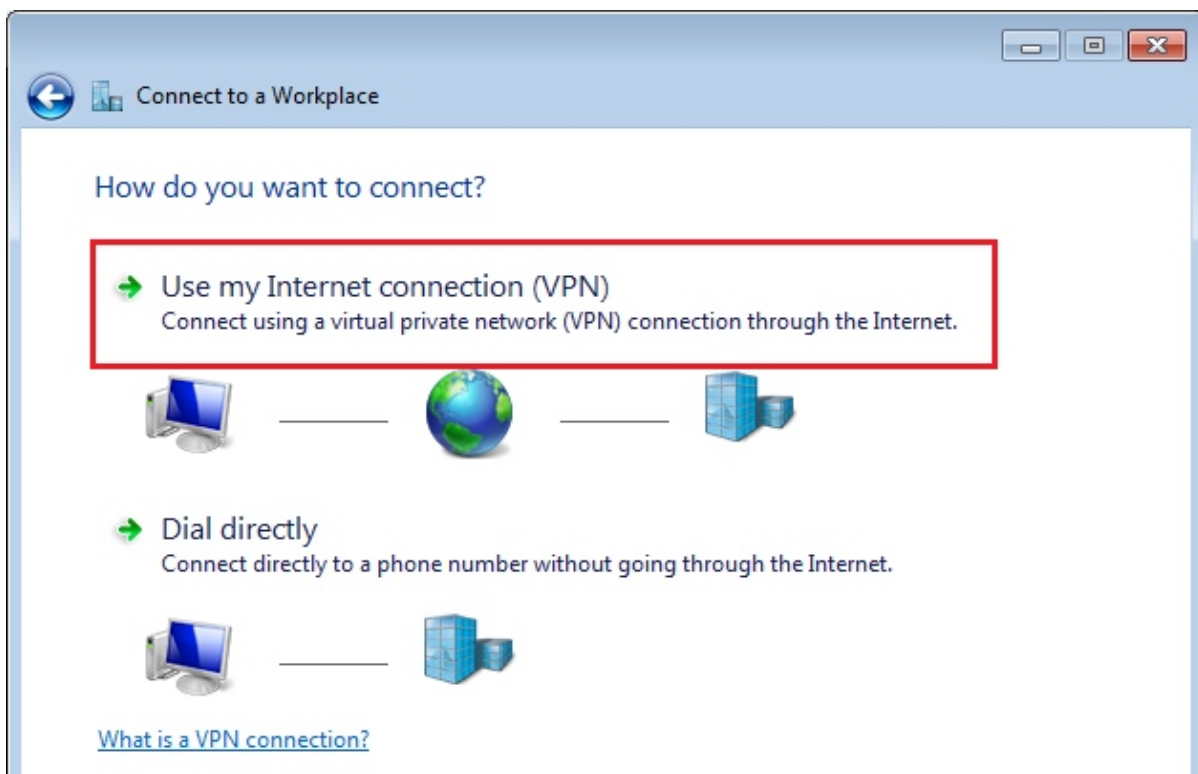

1. To start with, launch Control Panel and go to the Network and Sharing Center.
2. From here, you need to select the “Set up a new connection or network” option to start the process.

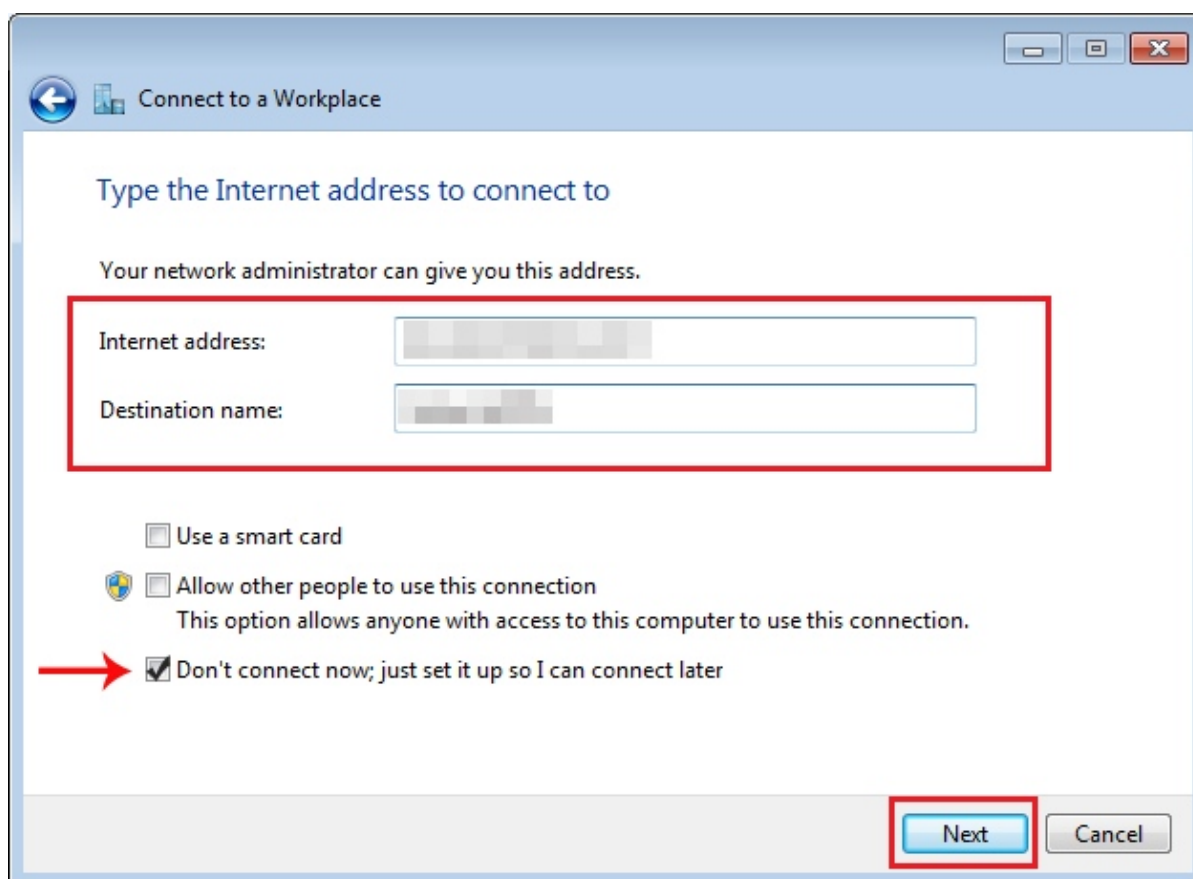

is will launch a new wizard that can be used to setup a PPTP VPN free. Out of all the provided ns, select the “Connect to a workplace” option.

4. On the next window, you would be given an option to either dial directly or use a VPN. Click on the “Use my Internet Connection (VPN)” option to continue.

PPTP VPN list we have provided in the previous section and pick the server (and hostname) of your choice.

6. As you would proceed to the next window, you need to provide the username and password of the PPTP VPN free you are using. The same can be obtained from our free PPTP VPN list.

Type your user name and password

User name:

Password:

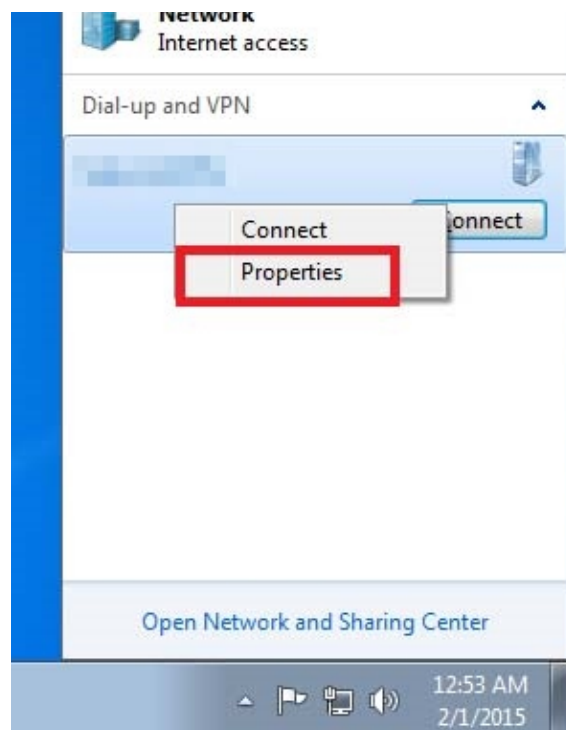

☐ Show characters

☒ Remember this password

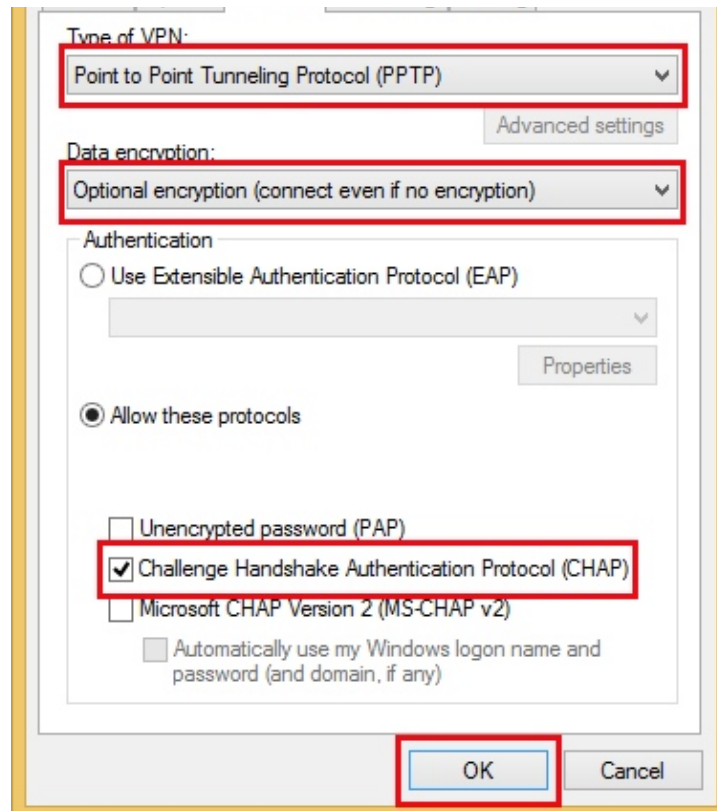

Domain (optional):

7. In the end, just click on the “Create” button to use your VPN. It will be listed under the available networks.

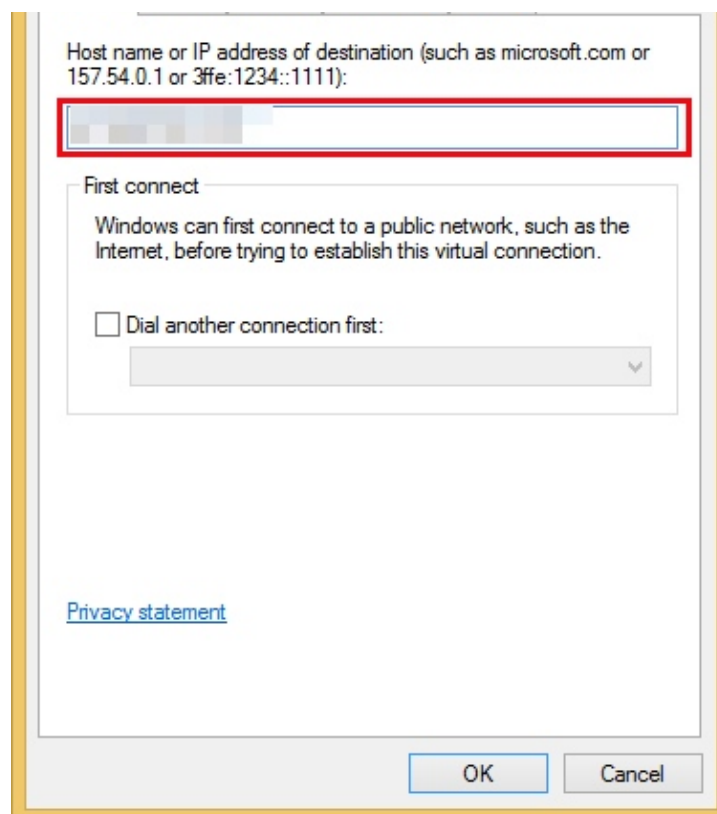

8. Sometimes, we have to change Network Settings to make it work. To do this, just select the VPN you have created and visit its Properties.

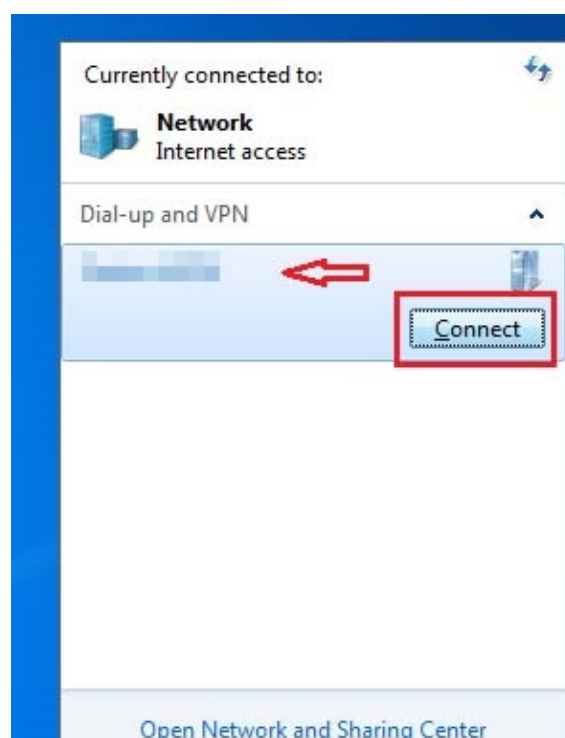

9. Go to the Security tab and make sure the type of VPN is listed as PPTP (Point to Point Tunneling Protocol). Also, the data encryption option should be “Optional Encryption (Connect even if no encryption)” and the option for “Challenge Handshake Authentication Protocol (CHAP)” should be selected for “Allow these protocols”.

10. Furthermore, you can go to the General tab to make sure the server is specified correctly.

11. Once it is done, you can save these changes and exit the interface. Now, go to the list of available networks and connect to the free PPTP VPN you have created.

Canada, Germany, or any other location. Simply give this tutorial a try and pick the preferred option from our free PPTP VPN list. If you also have a suggestion for a free VPN PPTP that you want to add to your list, then let us know about it in the comments below.

Part 4: An Easier Alternative to Setup VPN

You may find that there is a steep learning curve ahead to master PPTP VPN setup. In addition, the ways to set up PPTP VPN are quite different for various devices and PCs.

Is there an easier alternative to setup VPN?

Yes. There are quite a few easy-to-use VPN services available in the market, among which, [NordVPN](#) is one considered reliable by many users.

Some of its advantages are as follows:

- Supports VPN access on PCs and phones (even browser plugins available).
- Intuitive interface and easy operations.
- Offers 24/7 customer service.
- As low as about 3 USD per month.
